Chapter IX—War Production Board Subchapter B—Executive Vice-Chairman

AUTHORITY: Regulations in this subchapter issued under sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 176: E.O. 9024, 7 F.R. 329; E.O. 9125, 7 F.R. 2719; W.P.B. Reg. 1 as amended March 24, 1943, 8 F.R. 3666, 3696; Pri. Reg. 1 as amended May 15, 1943, 8 F.R. 6727.

PART 944—REGULATIONS APPLICABLE TO THE OPERATIONS OF THE PRIORITIES SYSTEM

(Priorities Reg. 25)

SPECIAL AUTHORIZATIONS FOR PRODUCTION OF RESTRICTED PRODUCTS

§ 944.46 Priorities Regulation 25—(a) What this regulation does. This regulation establishes methods to be used in authorizing the resumption of civilian production as local conditions permit. It provides a way by which manufacturers may be authorized to make articles which are otherwise restricted or prohibited by orders of the War Production Board but only when they have labor and facilities available which are no longer needed for essential purposes. present lack of labor, material and facilities is evidenced by present restrictions in WPB orders limiting or prohibiting the manufacture of certain items and requiring substitution of materials and simplification of design. Labor conditions in a number of areas are so critical as to prohibit or severely limit authorization of production under this regulation. Production under this regulation must in no way interfere with either war production, the production of essential civilian articles, or the rendering of services essential to the public welfare. The War Production Board will authorize production under this regulation only under these general policies and when the conditions described below

(b) What products are covered by this regulation. This regulation applies only to those products that are covered by WPB orders (such as an "L" or "M" order) in which provision is made for authorization to manufacture under this regulation, or which are listed on a direction to this regulation. No application to produce should be filed unless the product is covered by an order containing such a provision or so listed on a direction to this regulation. It is contemplated that orders and directions will be amended from time to time as conditions warrant the addition of permitted products or require the elimination of products previously permitted.

(c) Nature of authorizations. Authorizations under this regulation will not affect any provision of WPB orders except to the extent specifically provided in the order or in a direction to this regulation. Generally, such orders or directions will provide that authorizations under this regulation will only permit production of a restricted or forbidden product, and will not change simplification, standardization, specifications, or similar provisions of the order. Any authorization granted a manufacturer under this regulation may be revoked by the War Production Board at any time

it finds that the labor, materials, or facilities being used in such production are

needed for essential purposes.

(d) How to obtain permission. Production is authorized under this regulation only when specific permission is granted to the individual manufacturer by the War Production Board. If a person wishes to obtain authorization under this regulation and the applicable orders so provide or a direction has been issued to this regulation making provision for authorization to manufacture the product, he should file Form WPB 4000 accompanied by Form WPB 3820 (Revised) with the Field Office of the War Production Board for the district in which his plant is located. The application on Form WPB 4000 should be filed in accordance with the instructions on the form. If the application is approved, the person filing it will receive from the War Production Board an authorization stating the amount of production authorized and any special conditions applicable to manufacture by him.

(e) General policy in the granting of authorizations. The following indicate some important considerations of policy in the granting or denial of applications under this regulation. These should be borne in mind by manufacturers requesting authorization under the regulation:

(1) Authorization to produce will in no case be granted if production will in any way interfere with either war production or the production of essential

civilian articles.

(2) The labor and facilities to manufacture must be available to the applicant and not required for more essential purposes. The application will be denied if the applicant's proposed use of labor would interfere with local and inter-regional recruitment of labor.

(3) In general, more favorable consideration will be given to applications where the articles can be produced from idle, excess or frozen materials and components, whether in the applicant's inventory or available from others, than where new materials and components are required.

(4) Preference ratings of AA-5 will be assigned but only for the production of utility items of importance in civilian requirements. A list of these items can be obtained at your nearest local War Production Board Field Office. In general, more favorable consideration will

be given to applications for the production of these items.

(5) Before making application, the applicant should investigate the supply situation of the material and components which he will require. In general, more favorable consideration will be given to applications where the new materials needed to produce the product can be readily obtained with an AA-5 rating (if a utility item) or without a rating.

(f) Authorized production schedule, allotments and preference ratings. (1) A manufacturer whose application is approved under this regulation will be given an authorized production schedule and assigned a CMP allotment symbol on Form CMPL-150C. When controlled materials are available, allotments may be made in limited amounts and will be "deferred allotments" under Direction 54 to CMP Regulation No. 1. Preference ratings may be assigned as explained in paragraph (e) (4). Production of the product and the use of the allotment and preference rating are subject to the provisions of applicable CMP regulations. If the product which is authorized will not require the incorporation of steel, copper or aluminum in controlled material form (or incorporation of Class A components) the use of the preference rating is subject to the provisions of Priorities Regulation 11B. Persons operating under Priorities Regulation 25 are also subject to the provisions of other applicable priorities regulations.

(2) No person may use any material or products to fill a production schedule authorized under this regulation which he got by use of a preference rating or allotment symbol assigned for another purpose unless he is unable to use or dispose of the material or products for the purpose for which the rating or allotment was given. For instance, if a manufacturer has made vacuum cleaner repair parts by use of an allotment and preference rating assigned for that purpose, he cannot use any of those parts in making vacuum cleaners authorized under this regulation.

(3) Authorization of a production schedule under this regulation does not of itself give the applicant a preference rating of AA-5 under § 944.1 (b) of Pri-

orities Regulation No. 1.

(g) Acceptance and filling of rated purchase orders. A manufacturer who has received an authorization to produce a product under this regulation must continue to accept and fill rated purchase orders for all products in accordance with the provisions of Priorities

Regulation 1.

(h) Special treatment of unrated orders placed under this regulation. Certain orders of the War Production Board require a rating of AA-5 before a purchase order for products or materials covered by the order may be placed, or the products or materials be manufactured or delivered. Despite the provisions of any such WPB order, an unrated purchase order placed for materials required to fill a production schedule identified by the CMP Allotment Symbol Z-1 may be accepted and filled. The supplier may reject the order if he desires but if he accepts the order, it must be scheduled for production and delivery as an unrated order. In placing the order the buyer should endorse it with the allotment symbol Z-1 received on the CMPL-150C, and the standard certification of Priorities Regulation No. 7.

(i) Relation to appeals procedure. The appeals procedure provided for in orders and regulations of the War Production Board will continue in effect, with modifications (indicated in the respective orders), for those orders which are amended to permit production under this regulation. Also in the case of orders which have not been so amended and which are listed in a direction to this regulation, authorization is to be requested under this regulation if the only exemption sought is from provisions which prohibit manufacture entirely or restrict the amount of manufacture permitted. If relief from other provisions is sought, an appeal should be filed in the manner indicated in the particular order.

Issued this 15th day of August 1944.

WAR PRODUCTION BOARD, By J. JOSEPH WHELAN, Recording Secretary.

PART 944-REGULATIONS APPLICABLE TO THE OPERATIONS OF THE PRIORITIES SYSTEM

[Priorities Reg. 25, Direction 1]

WPB ORDERS COVERED BY PRIORITIES REGULATION 25

The following direction is issued pursuant to Priorities Reg. 25:

Production of products covered by the following WPB orders may be authorized un-Priorities Regulation 25. The order should be referred to, since it may still restrict models and types that may be made or materials that may be used, or impose other limitations on the product; from these provisions the regulation will in most cases afford no relief.

If one of the following orders is amended to refer to Priorities Regulation 25, authorization under the regulation will affect the provisions of the order only to the extent

provided in the amended order.

Until one of the following orders has been specifically amended to provide otherwise, authorizations granted under this regulation will give relief only from the provisions of the order which either prohibit manufacture entirely or restrict the amount of manufacture permitted. The authorization will not in any way relieve the person receiving it from any other restrictions of the order. For example, the following types of restrictions must still be complied with: Restrictions on the types of models which can be made, on the kind of materials which can be used, on the amount of materials which can be used in producing any unit of the article, on the end uses for which production is permitted, on deliveries of the product, on inventories, etc. Thus, with respect to an "L" order not amended to provide otherwise, which restricts both (1) the amount of material used in a plant's total production of an article and (2) the amount of material per unit manufactured, relief would be granted under this regulation from the first restriction but not from the second.

PART 1226-GENERAL INDUSTRIAL EQUIP-MENT

[General Limitation Order L-332, as Amended Aug. 15, 1944]

#### CONTAINER MACHINERY

The fulfillment of the requirements for the defense of the United States has created a shortage in the supply of material used in the production of container machinery for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 1226.137 General Limitation. Order L-332-(a) What this order does. This order restricts deliveries of new, used, and reconditioned container machinery; it does not restrict deliveries of repair parts. The order requires manufacturers to file monthly operations reports.

(b) Definitions. For the purpose of

this order:

(1) "Person" means any individual, partnership, association, business trust, governmental corporation or agency, or any organized group of persons, whether incorporated or not.

(2) "Container machinery" means all new, used, and reconditioned machinery and equipment of the types listed in Schedule A of this order having a retail sales value of \$500 or more (unless other-

wise indicated).

(3) "Manufacturer" means any person engaged in the fabrication, assembly, reconditioning or rebuilding of container machinery.

(4) "Dealer" means any person engaged in the business of purchasing con-

tainer machinery for resale.

(5) "Order" includes any ment for the delivery of container machinery or equipment, whether by purchase and sale, lease, rental or otherwise.

(c) Restrictions on sales and deliveries. After March 1, 1944, no person shall place an order for container machinery and no person shall accept such an order or deliver container machinery to fill an order received after March 1, 1944, unless the order bears a rating of AA-5 or higher. Neither shall any person make or accept delivery under any order placed or accepted before March 2, 1944, if delivery before that date would have violated Order L-83, as amended November 4, 1943.

(d) Exemptions. The limitations and restrictions of paragraph (c) shall not apply to the following transactions:

(1) The renewal of a lease for any container machinery if the original lease or any prior renewal was approved in accordance with this order (or Order L-83) and the machinery is still being used for the purpose approved.

(2) Any order for container machinery for the direct use of the Army, Navy, Maritime Commission or War Shipping

Administration.

(3) The seizure of container machinery (but not subsequent disposition or use thereof) upon default, by any person pursuant to the terms of a conditional sales agreement, chattel mortgage,

pledge, or other security agreement; and the distraint or levy by execution (but not subsequent disposition thereof) by tax authorities.

(4) The transfer of container machinery (but not subsequent disposition thereof) by will or intestacy, or a transfer by operation of law to a trustee, receiver, or assignee for the benefit of creditors, in bankruptcy, insolvency, re-ceivership, or assignment for the benefit of creditors.

(5) The transfer of container machinery as part of a transaction, such as merger, consolidation, sale and purchase of assets, sale and puchase of stock, or lease of plant, involving the transfer of all or substantially all of the assets of an enterprise, where no liquidation or dismemberment of assets is contemplated.

(6) The transfer of container machinery, within a plant, or within a single corporate enterprise (including majority owned subsidiaries) from one plant or branch to another: Provided, however, That nothing in this subparagraph (6) shall be construed to permit transfers from a portion of an enterprise manufacturing, building or assembling new machinery to a portion using it unless the material for its production was obtained in accordance with Direction 34 of CMP Regulation 1.

(7) The transfer of container machinery (but not subsequent disposition thereof) as a trade-in, where the ma-chinery to be installed is delivered pursuant to an approved order.

(8) Transfers of used container ma-

chinery to dealers.

(9) The delivery of container machinery for repair and return, the return of a repaired machine, and the loan of a machine to the user, for a period not to exceed three months pending the repair of the damaged machine.

(10) The transfer of container machinery to be scrapped for its material

content.

(11) The unloading, from a vessel, of any imported container machinery.

(12) The transfer of any interest in any written instrument evidencing an interest in container machinery: Provided, however, That nothing in this subparagraph (12) shall be construed to permit the physical delivery or use of container machinery.

(13) The return of any leased container machinery by the lessee to the lessor upon the expiration, termination,

or cancellation of the lease.

(14) The exchange of leased container machinery requiring factory repairing or rebuilding for new, reconditioned or rebuilt units fitted for the same size container, and of like model, size and capacity, provided the machinery to be replaced was approved in accordance with this order (or Order L-83) and the machinery to be acquired will be used for the purpose approved.

(e) Operations reports. Each manufacturer shall, on or before the 10th day of each month, commencing with March, 1944, file with the War Production Board an operations report on Form WPB-3551, in accordance with the instructions accompanying the form.

(f) Miscellaneous provisions-(1) Applicability of regulations. This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board as amended from time to time.

(2) Violations. Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(3) Appeals. Any appeal from the provisions of this order shall be made by filing a letter, in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal. The letter must be filed with the field office of the War Production Board in the district in which is located the plant or branch of the appellant to which the appeal relates.

(4) Communications. All reports required to be filed hereunder and all other communications concerning this order shall, unless otherwise directed, be addressed to the War Production Board, General Industrial Equipment Division, Washington 25, D. C., Ref. L-332

Issued this 15th day of August 1944.

### INTERPRETATION 1

## FOOD PROCESSING MACHINERY

Paragraph (a) (5), in defining "approved orders" for food processing machinery, includes orders bearing a preference rating of

AA-5 or higher assigned on certain specified forms (WPB-C17, 576, 748, etc.). These forms in some cases call for the name and address the supplier.

In these cases, the information intended is the name and address of the probable supplier. Provided the model actually obtained is substantially identical in value, quality, size, operation and function with that named in the application form, the preference rating may be used to get the product from any manufacturer, dealer or processor who has the product on hand or is authorized to manufacture or acquire it. For example, a rating assigned to purchase a 1" centifugal sanitary pump may ordinarily be used to purchase that size pump from any manufacturer if the value is substantially the same as that of the pump described in the application. On the other hand, a rating assigned for a 6-can-perminute dairy can washer costing \$1000 may not be used to get a 6-can-per-minute can washer costing \$2500. Similarly, a rating for a copper lined cheese vat may not be used to get a stainless steel cheese vat.

Approval of the form does not operate to authorize the supplier, whether or not named, to manufacture or acquire the product if that is otherwise prohibited. [Issued March 31, 1944.]

#### INTERPRETATION 2

#### FOOD PROCESSING MACHINERY

In accordance with paragraph (f) of General Limitation Order L-292, as amended, certain quota schedules have been established limiting the amount of controlled materials which may be used in manufacturing certain classes of food processing machinery during a specified quota period. The quota is a percentage of the average annual amount of such material consumed during a specified base period. The per-centage applies to each controlled material (steel, copper or aluminum) separately. No part of the percentage of one controlled material shall be added to the total percentage of another. However, the permitted percentage of a particular controlled material may be divided in any way between the sev-eral categories of such material. For exam-ple: where a manufacturer is permitted to consume during the quota period 110% of the average annual amount of steel and copper he consumed during the base period, he is not permitted to apply part or all of his steel quota to his copper quota and thereby exceed his copper quota of 110%. However, he may consume during the quota period such amount of carbon steel and such amount of alloy steel as he chooses provided the aggregate does not exceed 110% of the average annual amount of steel consumed during the base period. This rule is subject to the restriction of any order of the War Production Board against the use of a higher grade or larger quantity of material than is necessary (for example, see paragraph (c) (1) of Order M-9-c, dealing with copper). PART 3290—TEXTILE, CLOTHING AND LEATHER

[General Conservation Order M-217, Interpretation 7]

EFFECT OF COLOR RESTRICTIONS ON INVEN-TORY LIMITATION IN PRIORITIES REGULA-TION 1

The following interpretation is issued with respect to General Conservation Order M-217:

Paragraph (c) (5), limiting the use of colors in footwear, affects the application to shoe manufacturers of the inventory restric-

tion contained in § 944.14 of Priorities Regulation 1. This section of Priorities Regulation 1 provides that no person shall accept delivery of any material if the inventory of such material of the person accepting delivery is, or will, by virtue of such acceptance, become in excess of the practicable minimum working inventory reasonably necessary to meet deliveries of the products of the person accepting delivery, on the basis of his current method and rate of operation.

Paragraph (c) (5) of Conservation Order M-217 prohibits the use of any materials for uppers except material finished or dyed in certain specified colors. Accordingly, any deliveries of upper leather or other material for uppers in colors which are not permitted would constitute a violation of Priorities Regulation 1, since the practicable minimum working inventory reasonably necessary to meet deliveries is, under Priorities Regulation 1, to be computed on the basis of the current method and rate of operation. Inasmuch as manufacturers are not currently permitted to use certain colors, the priorities regulation does not permit the acceptance of deliveries of materials in these colors.

Issued this 15th day of August 1944.

(2) The ceiling price or prices under this regulation for each of the sausage products listed in paragraph (a) (1) shall be the seller's ceiling price or prices for each such sausage product in effect on August 18, 1944. The ceiling price or prices under this regulation for each such sausage product shall be subject to the same discounts, allowances and trade practices applicable to the ceiling price or prices in effect on August 18, 1944.

(3) Not later than September 19, 1944, any person manufacturing and making sales or deliveries of any sausage product listed in paragraph (a) (1) of this section shall file with the Office of Price Administration, Washington, D. - (4) Intermediate distributors. (i) If a hotel supply house, wholesaler, or peddler-truck seller has paid a charge under paragraph (c) (1) (i) of this section, he may, upon resale, add \$0.50 to the base price.
- (ii) If a hotel supply house, whole-saler, or peddler-truck seller has paid any charge under subparagraph (c) (2) of this section, he may, upon resale, add the amount of such charge to the base price: Provided, That no buyer is charged more than \$0.50 per hundred-weight for local delivery under paragraph (c) (2) of this section and the addition under this paragraph (c) (4) (ii) combined.
- (iii) If a hotel supply house, whole-saler or peddler-truck seller has paid any transportation charge to a common carrier under section 2 (b) (1) (ii) (d), he may, upon resale, add the amount of such charge to the base price.
- 10. The definition of "Peddler-truck sale" in section 13 (a) is amended to read as follows:

"Peddler-truck sale" means a sale of sausage from a truck involving a delivery of not more than 50 pounds of sausage and not more than 150 pounds of meats, edible meat by-products and sausage in any one day from the truck to any buyer's store door, where the first record of the transaction is made by the salesman concurrently with the delivery of the products sold, (1) by a person who purchases meat, meat by-products, or sausage at or below the ceiling price from a seller with whom he has no other financial affiliation or relationship, who takes delivery at the seller's place of business, and who does not sell or deal in sausage in any manner other than sales out of stock carried in a truck owned and driven by him; or (2) by a person who makes all his sales of sausage out of stock carried in a truck driven by him but owned by a person who used such truck exclusively for this type of sale during the month of March, 1942. The term "Peddler-truck cale" does not include deliveries made pursuant to prior orders. Where either the 50 or 150 pound quantity limitation included in the definition of "Peddler-truck sale" is exceeded, no part of the delivery of sausage to the buyer that day may be considered a peddler-truck sale.

11. The definitions of "Kosher sausage" and "Yield" in section 13 (b) are amended and a definition of "Percent" in the proper alphabetical place in section 13 (b) is added, all to read respectively as follows:

"Kosher sausage" means sausage which is made from beef and detached beef fat derived from animals slaughtered, approved and stamped as kosher under rabbinical supervision; which is manufactured under rabbinical supervision and marked as kosher; and which is sold under rabbinical supervision to a person who maintains a selling establishment at or through which he regularly sells Kosher meat as such, or to a person who is a purveyor of kosher meats.

"Yield" means the finished weight of the product divided by the weight of the meat, meat by-products and extender used and expressed as a percentage. The weight of the meat, meat by-products and extender is to be considered the weight of such ingredients in the sausage kitchen immediately prior to chopping and mixing.
"Percent" when used with reference

"Percent" when used with reference to the portion of any meat or meat byproduct contained in a sausage product, means the portion of the total weight of meat and meat by-products as weighed in the sausage kitchen immediately prior to chopping and mixing; when used with reference to the portion of extender or fat contained in a sausage product, it means the portion of the total weight of the finished sausage product.

- 12. The last sentence of the definition of "Bologna" in section 13 (c) is amended to read as follows: "It includes knackwurst but does not include Lebanon bologna."
- 13. The definition of "Type 1 special pork sausage" in section 13 (d) is amended to read as follows:

"Type 1 special pork sausage" means sausage made from pork; which contains at least 45 percent of boneless hams, shoulders, and loins and not less than 10 percent of any one of these cuts; which is stuffed in sheep or lamb casings or sold as bulk sausage meat; which is packed in one pound cartons on which shall be a printed statement that the sausage contains at least 45 percent of boneless hams, shoulders and loins; which has a fat content not in excess of 50 percent; which contains no extender; which has a yield not in excess of 100 percent; and which has been made under federal inspection.

14. The definitions of "Kosher frankfurters, bologna and knackwurst" and "Kosher salami" in section 13 (e) are amended to read respectively as follows:

"Kosher frankfurters, bologna and knackwurst" means kosher sausage containing no meat other than beef and beef fat and containing no meat byproducts; which has been smoked and cooked in the smokehouse; which is stuffed in casings; which has a fat content not in excess of 25 percent; which contains no more than 10 percent added moisture or water; and which contains no extender.

15. The definitions of "Loaf" and "Type 3 loaf" in section 13 (f) are amended respectively to read as follows:

"Loaf" means a product made of chopped, ground or comminuted meat or

meat by-products or any combination thereof; seasoned; prepared in loaf form; with condiments added if desired; cooked or baked; which has sufficient stability to withstand handling; which is sold unwrapped or stuffed in artificial casings or packed in sealed printed cardboard cartons, or sealed printed wrappers made from cellophane, parchment or other moisture resistant paper, with such cartons or wrappers having the loaf manufacturer's brand name or trade-mark printed thereon. The use of caul fat as a covering does not make caul fat an ingredient within the meaning of this regulation.

"Type 3 loaf" means a loaf which is made of any combination of one or more of pork, beef, veal, pork cheek meat, pork head meat and mutton; which has a fat content not in excess of 30 percent; which contains no more than 20 percent of added moisture or water; and which contains no more than 15 percent of ex-

[Rev. RO 16,1 Amdt. 16]

MEAT, FATS, FISH AND CHEESES

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.\*

The definition of "Household salvage fats", in section 27.1 (a), is amended by adding the following two sentences to the end of the definition: "(When original containers of household salvage fats are placed in drums or other bulk containers for convenience in storing or shipping, some of the household salvage fat may, of its own accord, flow out of the original containers into the drum or bulk container. Such fats do not, for that reason, cease to be household salvage fats.)"

This amendment shall become effective August 19, 1944.

## WAR MANPOWER COMMISSION.

AUBURN, CAYUGA COUNTY, N. Y. MINIMUM WARTIME WORK WEEK

Designation of the Auburn Labor Market Area as subject to Executive Order No. 9301.

By virtue of the authority vested in me as Regional Manpower Director of Region No. II by § 903.2 of War Manpower Commission Regulation No. 3, "Minimum Wartime Workweek of 48 hours," (8 F.R. 7225), and having found that such action will aid in alleviating labor shortages which are impeding the war effort, I hereby designate the Auburn Labor Market Area as subject to the provisions of Executive Order No. 9301.

I. For the purposes of this designation, the Auburn Labor Market Area shall include:

Cayuga County in the State of New York.

II. The effective date of this designation is September 15, 1944.

III. Not later than the effective date, each employer in the Auburn Labor Market Area shall, in accordance with War Manpower Commission Regulation No. 3:

(a) Extend to a minimum wartime workweek of 48 hours, the workweek of any of his workers whose workweek can be so extended without involving the release of any worker;

(b) If extension of the workweek of any of his workers to a minimum wartime workweek of 48 hours would involve the release of any workers, submit to the Area Manpower Director the number and occupational classification of the workers whose release would be involved, together with proposed schedules for their release, and thereafter extend such workweek when and as directed in schedules authorized by the War Manpower Commission;

(c) File an application for a minimum wartime workweek of less than 48 hours for those workers engaged in employment in which the employer claims that a workweek of 48 hours would be impracticable in view of the nature of the operations, would not contribute to the reduction of labor requirements, or would conflict with any Federal, State or local law or regulation limiting hours of work.

Date of issuance: August 11, 1944.

Anna M. Rosenberg, Regional Director.
